

bott UK SV300

Smart Drawer Solution

SV300 Solution

The SV300 allows authorised users to access products through a secure drawer-based system, improving accountability while maintaining ease of use.

Users can select the required items via the software interface, after which the designated drawer unlocks, allowing items to be picked directly. The system also supports the issue and return of valuable tools and assets, making it ideal for manufacturing, engineering, maintenance, and production environments.

Benefits

- Improved tool accountability and traceability
- Reduced stock loss and misplaced equipment
- Increased operational efficiency
- Reduced administrative workload
- Controlled access to high-value assets
