XP8 CUT-RESISTANT
GLOVES

A NEW GENERATION OF
ULTRA-HIGH-PERFORMANCE FIBRES

THE ULTIMATE COMBINATION
OF PERFORMANCE
AND SUSTAINABILITY

3X STRONGER
THAN STEEL

UP TO **55%** RECYCLED
FIBRE

WASHABLE **3X**

THE ULTIMATE COMBINATION OF PERFORMANCE AND SUSTAINABILITY

Our range of gloves is the result of combining the new generation of XP8 cut-resistant fibres with recycled fibres.

XP8 fibre offers exceptional performance:

- **3X stronger** than steel for the same level of protection, without the use of glass or steel fibres (*except for the TDM F model: XP8 922N).
- **25% lighter** than other fibres, offering equivalent cut protection and unrivalled comfort.

We've combined high-performance XP8 fibre with **recycled polyester fibres** as part of our OPSIAL GREENER TOGETHER initiative to minimise the environmental footprint of our products. These gloves offer **an extended lifespan** thanks to:

- their ability to be washed up to three times
- their **maximum resistance to abrasion** (4)
- their reinforcements at thumb level

XP8 CUT-RESISTANT GLOVES

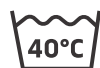

Excellent GRIP in **OILY or WET conditions**: Nitrile, sandblasted finish.

Nitrile **thumb-index reinforcement** for extra durability.

TDM C to F: a level of cut protection up to maximum protection.

Washable 3X*

Knit made from **up to 55% recycled polyester*** and zero plastic packaging.

Excellent levels of comfort and dexterity

Level 4 abrasion resistance for maximum durability

Contact heat resistant* (up to 100°C for 15 seconds)

EN 407 X1XXXX

Touch screen compatible

SANITIZED® certified gloves: treatment to prevent the development of odour-causing bacteria.

XP8 gloves have the **OEKO-TEX®** label, guaranteeing effective protection against substances that are harmful to the skin.
