SafeDon®
INTELLIGENT DISPENSING

Introducing SafeDon

The first intelligent dispensing system that is transforming the disposable glove market.

Unique features:

Cuff 1st™ glove dispensing system

- Each glove dispenses cuff first, allowing for easy donning

Reduces the risk of cross-contamination

- No need to touch the dispenser or the fingers and palm of each glove

Eliminates glove wastage

- Dispenses one glove at a time, unlike standard dispensers where multiple gloves are often dispensed

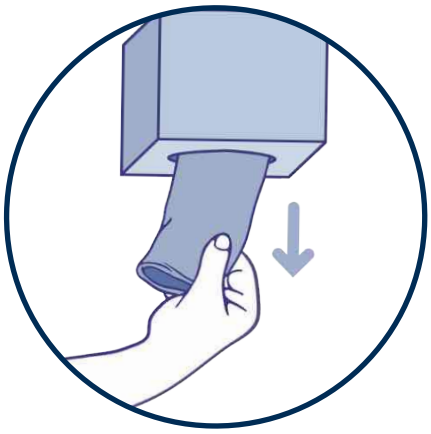
Compact format

- 200 gloves interleaved per box
- Optimises storage space
- Reduction in carbon footprint compared to standard glove boxes
- Reduction in packaging compared to standard glove boxes

SafeDon®
INTELLIGENT DISPENSING

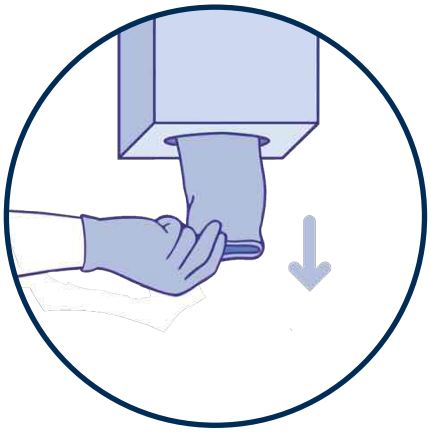
How to use SafeDon

1 **Using your dominant hand, pull on the dispensing glove.**

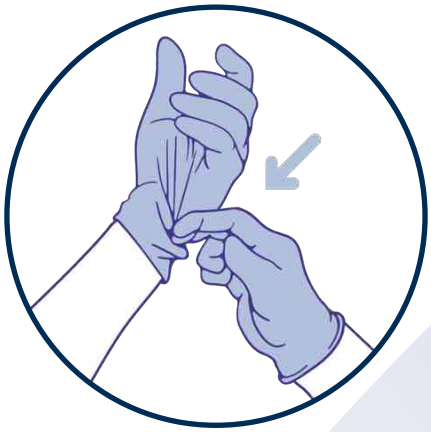


2 **Now don the glove on the other hand (not the dominant hand).**

3 **Using your gloved hand, pull on the dispensing glove.**



4 **Now don your dominant hand with your gloved hand.**



Hygienic and Clean Dispensing

DISPENSING: Safedon® gloves are dispensed from the box cuff first, one at a time, which results in less glove waste.

DONNING: Pulling a glove out by the cuff, means there is no accidental touch to any surface area of the glove whilst donning.

PRODUCTIVITY: Using a cuff-first dispensing system allows for efficient glove usage, enabling users to put on one glove at a time and quickly proceed with their task.

SafeDon
INTELLIGENT DISPENSING

SafeDon Blue Nitrile Powder Free Exam Gloves

SD91E

- Packed in a Cuff 1st™ dispenser for reduced cross-contamination
- Dispenses one glove at a time, eliminating glove wastage
