

HAYLEY DEXIS Becomes United Kingdom's First SKF Sustainability Partner

HAYLEY DEXIS has become the first SKF Sustainability Partner in the UK, joining the Sustainability Partner Programme as a long standing authorised distributor of SKF. The Programme empowers HAYLEY DEXIS to assume new responsibilities in collaborating with SKF to promote solutions that have sustainable advantages to its customers. With this partnership Hayley DEXIS can take your sustainability transformation around the rotating shaft to the next level by leveraging the full SKF portfolio. Discover new business models, explore opportunities for efficient maintenance and remanufacturing, equipment life extension, RecondOil filtration systems and customization of your industrial equipment.

This SKF programme is equipping HAYLEY DEXIS with specialised knowledge, tools, and dedicated support. It enables them to advise customers across industries on the SKF products and solutions that can help them take meaningful steps towards achieving their sustainability goals. This programme emphasises the importance of collaboration to accelerate the shift towards more sustainable industrial practices. Its core objective is to help businesses reduce their sustainability impact by considering the entire value chain, from product design and production to transportation and logistics, and ultimately the use, extended use, and re-use of products and materials.

HAYLEY DEXIS and their customers will benefit from the Partnership through:

- Identify improvement opportunities: HAYLEY DEXIS will be trained to help customers uncover opportunities to optimise processes and strengthen the sustainability performance.
- Trusted technical advisors: Enhanced technical and sustainability training equips HAYLEY DEXIS to recommend SKF solutions that strengthen operations and help customers advance their sustainability goals.
- Co create for innovation: Collaboration across the value chain enables sustainability focused innovation based on customers' evolving needs.
- Driving measurable progress: With access to SKF's tools and methodologies, HAYLEY DEXIS can support customers in achieving measurable improvements across their value chain.

Roopesh Chandran, Commercial Director at HAYLEY DEXIS said, “We are delighted to be the first SKF Sustainability Partner in the UK. We see it as a real strength to have the SKF brand behind us. The objectives of the programme align perfectly with those of HAYLEY DEXIS, as we continually strive to deliver value for our customers, helping them to reduce their environmental impact by implementing new product innovations or services.” He added, “We have already seen strong results with solutions such as the SKF RecondOil Box and bearing remanufacturing and look forward to expanding these opportunities across industries.”

Ian Peverill , UK Managing Director and ENW regional Sales Manager at SKF stated, “We are very pleased to welcome HAYLEY DEXIS as our first UK Sustainability Partner. The programme reflects the growing need for collaboration across the value chain, and by combining SKF’s engineering expertise with HAYLEY DEXIS’ strong customer relationships, we can better support our customer.” He added, “We thank HAYLEY DEXIS for their commitment to the Programme, as it has already created momentum and value. We look forward to continuing this journey together.”
