### THE SITUATION

At a facility making car safety equipment, vending machines supplied by a competitor of HAYLEY DEXIS were providing a controlled supply of personal protective equipment (PPE), general consumables, and a range of electrical components, essential to daily operations.

The machines had been in-situ for a number of years, and the customer was looking for an upgrade. The customer also wanted the new solution to be more reliable and provide a more user-friendly dispensation of product for engineers.

### THE SOLUTION

The HAYLEY DEXIS solution comprised of two SV390 units and one SV050-10. These vending machines are configured to supply a controlled range of products specified by the customer, ensuring that critical items are always accessible while maintaining strong oversight of usage and stock levels. This controlled distribution model enhances accountability and reduces waste.

To support the system, two dedicated onsite personnel manage replenishment and stock control.

Their presence ensures timely restocking, accurate inventory management, and seamless operational continuity throughout the site.

“  
THE NEW MACHINES  
HAVE UNLOCKED A  
RANGE OF VALUABLE  
BENEFITS FOR THE  
CUSTOMER.

”

### THE RESULT

The introduction of the new vending solution has delivered a noticeable improvement in operational efficiency, stock visibility, and product availability. By replacing the previous competitor equipment with modern SV-series machines, the site now benefits from more reliable dispensing, reduced downtime, and a smoother flow of essential items to the workforce.

The controlled distribution of PPE, consumables, and electrical components has strengthened governance and reduced unnecessary usage, contributing to better cost control and more accurate forecasting. With two dedicated onsite personnel managing replenishment, the site now operates with consistent stock accuracy, timely restocking, and improved continuity across all departments.

Overall, the solution has enhanced productivity, increased accountability, and provided a more dependable supply chain for day-to-day operations.

### KEY SOLUTIONS

HAYLEY DEXIS smartVEND SV390 and SV050-10 vending machines.

### KEY RESULTS

Operational efficiency improved.

Stock visibility and availability improved.

Vending of critical items made more reliable, reducing downtime risks.

Stock replenishment guaranteed.
