NSF Approved Products

The NSF mark is your assurance that a product has been tested by a trusted independent certification organisation.

Manufacturers, regulators and consumers look to NSF for the development of public health standards and certification programmes that help protect the world's food, water, consumer products and environment.

As a global, independent organisation, NSF standards team facilitates development of public health standards, and their service teams test, audit and certify products and services. The NSF mark assures consumers, retailers and regulators that certified products have been rigorously tested to comply with all standard requirements.
